# SITUATION SUMMARY

## Cal OES SOUTHERN REGION

### **Flaring Event, Torrance, Los Angeles County, SPILL: 16-8188**

- On 10/11/16 at 0640 hours the California State Warning Center (CSWC) received a report from the Torrance Refining Company advising that the company experienced a facility wide power failure which caused a unplanned flaring event.
- [On 10/12/16 at 0647 hours, the Torrance Refinery Company advised the CSWC that the refinery continues to flare.](#)
- The Torrance Refinery Company's Emergency Operations Center (EOC) is activated and the Los Angeles County Office of Emergency Management (OEM) Duty Officer is in contact with the refinery company's EOC.
- Per the Cal OES Southern Region Duty Officer (SDO), there are no emergency management issues and no state assistance is required.
- Cal OES Duty Officers will continue to monitor the situation and provide updates as warranted.

# WEATHER OF CONCERN

## Weather of Concern

- A prolonged period of very wet and windy weather is forthcoming this week for much of Northern and parts of Central California.
- There will be a series of weather systems rotating through the region that will bring heavy rain (storm totals as much as 5-10" in some locales), gusty winds in excess of 50 mph (think possible downed trees and power lines), and even snow accumulation in the higher terrain (possibly impacting travel through higher mountain passes).

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/www\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php)

# **WEATHER SYNOPSIS BY REGION**

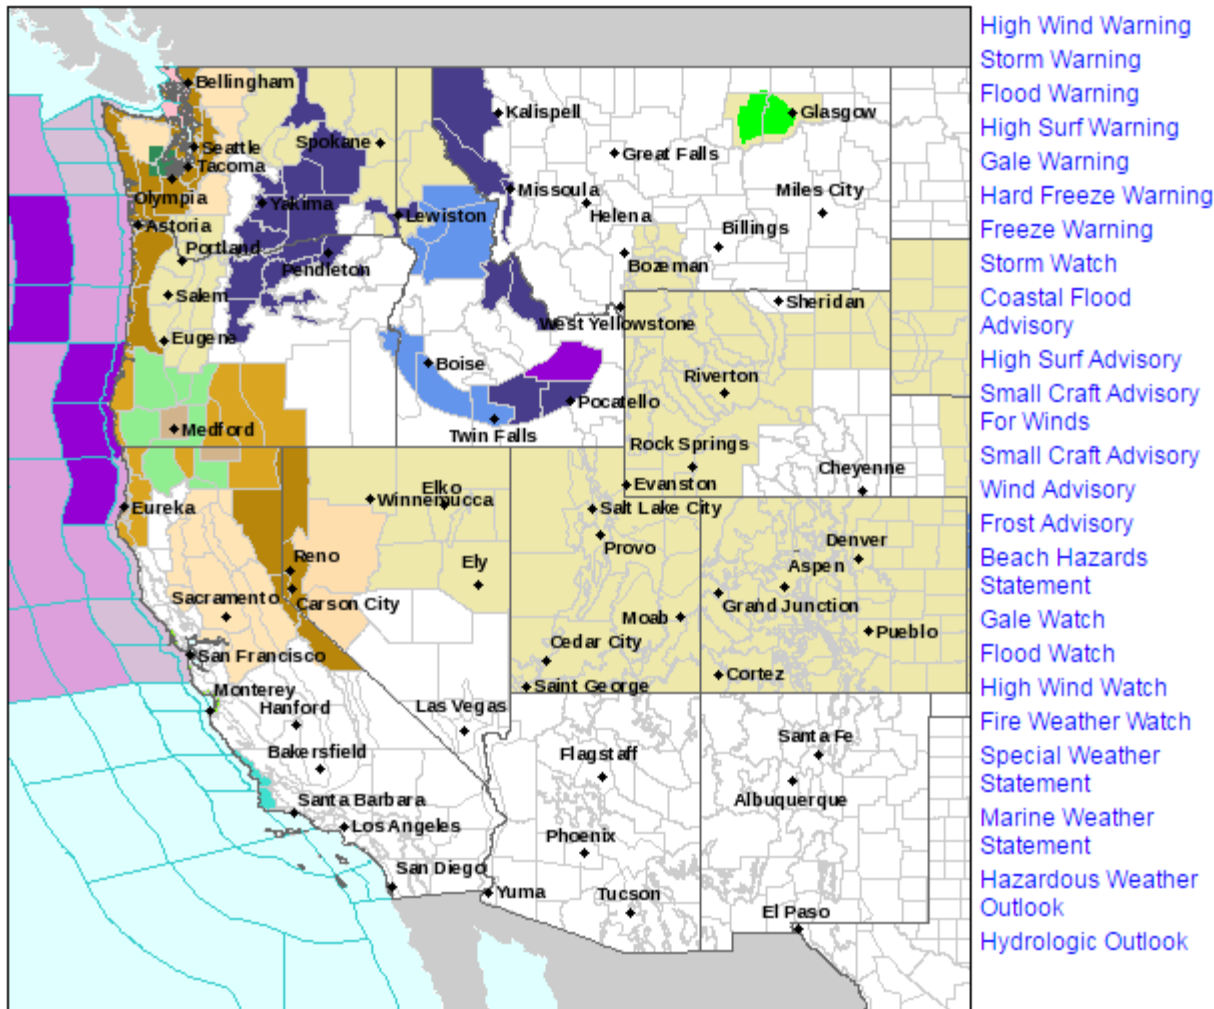

## **NORTHERN CALIFORNIA**

A somewhat weak trough will move ashore today with some cloudiness and slightly cooler temperatures for the region. A much stronger trough out over the Pacific will also be working its way eastward today and will probably bring some light precipitation to the North Coast as early as tonight. The western half of the Geographic Area will see rain or snow develop during the day Thursday and overnight throughout the rest of the region. There will also be some gusty southerly winds Thursday, but no High Risk conditions will come with that as it will be too wet/humid for such as that. Some gusts around 40-50 mph will be possible over the higher elevations in the southern Shasta Valley (greater Weed area) with the incoming system Thursday, however. There will likely be a break in between systems Friday with lighter precipitation before the next very wet weather system arrives over the weekend. A third system is expected early next week. All this will keep the Northern California region moist and unseasonably cool through the 7 day period. Snow levels will drop to around 5000-6000 feet over the weekend. There will be areas with moderate to locally heavy precipitation Thursday and over the weekend, and the wettest areas in the NW and over the Sierra could easily see totals of 3-5 inches fall by late next Tuesday, and locally more. The warmest areas will be in the low to mid 60s this weekend.

## **SOUTHERN CALIFORNIA**

A quiet weather pattern can be expected the next couple of days as a weak trough pushes inland. This trough will bring an increase in onshore flow and cooler temperatures to the region. Highs will drop 3-5 degrees each day through the middle of the week with highs in the 60s along the coast and in the mountains to the upper 70s in the valleys today. Southwest winds of 20-30 mph with gusts to 40 mph can be expected in and near the Antelope Valley, Banning Pass and the eastern Cleveland National Forest today. Winds will be weaker today and Tomorrow. Expect marine layer stratus to reach some of the valleys today and tomorrow and during the night and morning hours. Late this week through the weekend, three storm systems are expected to impact the northern half of the state. Significant wetting rains will be possible from the Bay Area northward. Most of the precipitation will stay north of the area, but the central coast and the Sierras from Yosemite National Park northward will see light measureable rain Friday afternoon and possibly again Sunday. A much weaker storm may arrive Tuesday. Strong west winds up to 50 mph will be possible in the Sierras eastward into portions of the Inyo National Forest Friday and Sunday. After a brief warmup Thursday, look for temperatures to drop back to a bit below normal over the weekend. No offshore winds are expected through the period.

# WEATHER MAP

Last map update: Oct, 12th 2016 at 6:07:16 am MDT

**Cal OES**  
GOVERNOR'S OFFICE  
OF EMERGENCY SERVICES

## **Current CAL OES Proclamations**

### **Soberanes, Vegetation Fire, Monterey County**

- On 07/26/16, Acting Governor Tom Torlakson issued emergency proclamations for Monterey County due to the effects of the Soberanes Fire.
- On 07/24/16, Monterey County proclaimed a local State of Emergency.
- On 08/04/16, Monterey County requested assistance through CDAA and a Federal Declaration in order to request federal assistance through the Stafford Act.
- On 08/31/16, a signed revised extended Proclamation was received from Monterey County which includes both the Soberanes and Chimney Fires. The County requested CDAA for debris removal.

### **Loma, Vegetation Fire, Santa Clara and Santa Cruz Counties**

- On 09/27/16, a Proclamation was received from Santa Cruz County for the Loma Fire. There are no requests for state assistance.
- On 09/30/16, a Proclamation was received from Santa Clara County. There are no requests for state assistance.
- On 10/07/16, a Ratified Proclamation was received from Santa Clara County for the Loma Fire. There are no requests for state assistance.
